These Are The Reasons Why It Is Needless To Pay More Than \$985

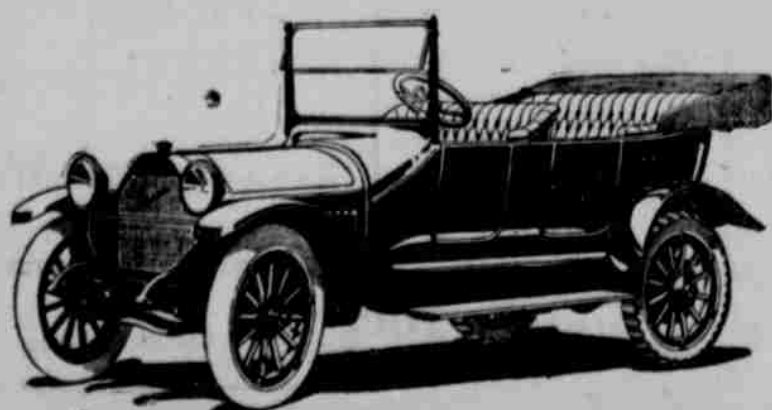

And you'll see more—many more—when you come to look at the car itself. But these are enough to give you some idea of what you'll find. And when you find other cars that cost from \$90 to \$225 more than this Studebaker, omitting or deliberately trying to make advertising capital of designs that are admittedly not as good—you can draw your own conclusions as to whether it is wise to pay more than \$985 for another car.

And you don't want to judge this FOUR on price either. NOT for a minute. You find QUALITY in every detail of it. You find the most approved design. You find accuracy of manufacturing that strikes the average man as miraculous. But you expect to get that from a plant that is recognized as one of the largest in the business. And Studebaker is. And just so, you expect a relatively low price from such a manufacturing organization. For the simple reason that you know large scale manufacturing results in economies, low costs that other plants can never begin to touch.

And so it is not price—but QUALITY that we want you to look for. And we are entirely willing—even eager to have your choice rest on just that matter of QUALITY. For we know that when you set this Studebaker beside other cars, you'll decide in your mind, as many thousands of careful men have already done—that it is needless to pay more than \$985 for a FOUR—and unwise to pay less. The car is at your convenience at any time—and for any tests, hills' roads, anything—

because it's a

Studebaker
Four \$985

We Would Ask

every contractor to send us their next set of plans for estimate on door and window frames, and do not forget that we always make them a little better than the other fellow.

We make it a point to joint all our jamb and casing stock before it goes into the cabinet room to be nailed up. This we all know insures a good running window. Case work a speciality.
